

Prospect App Redesign: Problem-Solution Mapping

From 45+ Broken Tabs → 6 Working Modules

● Current Problems (from User Feedback)

Navigation Nightmare

- 45+ tabs with ~80% non-functional
- "Too much filler"
- "Not properly organized"
- "Not easily navigatable"
- Duplicate features everywhere

Missing Core Features

- No AI script writer
- No AI caller
- No WhatsApp agent
- No image creation from OpenAI
- No video creation tools

Impossible Promises

- Automatic MLM commission tracking (no APIs exist)
- Team hierarchy from back office (no access)
- Social media analytics (no permissions)
- Automatic email tracking (using personal emails)

Poor User Experience

- "Buttons don't work"
 - "Wrong dates"
 - "Empty tabs"
 - "Seems like duplicate"
 - "Serves little to no purpose"
-

✓ Our 6-Module Solution

1. Dashboard Hub

Solves: "Too many tabs", "Not easy to navigate"

- Today's top 3 priorities
- Quick action buttons
- AI daily tip
- Progress snapshot

2. Smart CRM

Solves: "Add contact doesn't work", "Lead scoring confusion", "Pipeline purpose unclear"

- Working contact management
- Manual lead scoring with AI suggestions
- Visual pipeline (Kanban board)
- Deep links for WhatsApp/phone/email

3. AI Content Studio

Solves: "Where is our AI script writer?", "Content Calendar issues", "Batch Creation broken"

javascript

```
features: {  
  aiPostGenerator: "Platform-specific content",  
  aiScriptWriter: "Video scripts, email templates",  
  aiImageCreator: "DALL-E 3 integration",  
  avatarVideos: "D-ID for video messages",  
  contentVault: "Organized storage"  
}
```

4. AI Business Coach

Solves: "AI Coach needs improvement", "Templates don't work"

- 24/7 coaching chat
- Objection handling practice
- Script library
- Voice coaching (future)

5. Team Collaboration

Solves: "How will people add each other?", "Cannot track team metrics"

- Simple invite system
- Manual tracking only
- Team challenges
- Resource sharing

6. Business Tracker

Solves: "Commission tracking without APIs", "Manual metrics needed"

- Photo upload with OCR
- Manual entry with smart defaults
- Goal tracking
- Habit streaks

Key Design Principles

1. Honest Capabilities

✗ **Before:** "Automatic MLM data sync" (impossible) ✓ **After:** "Manual entry with photo scanning"

2. Consolidation

✗ **Before:** 5 training systems, 4 resource libraries ✓ **After:** 1 Learning Center, 1 Content Vault

3. Mobile-First

✗ **Before:** Complex desktop-style navigation ✓ **After:** Bottom nav, one-thumb operation

4. AI Where It Matters

✗ **Before:** AI as a checkbox feature ✓ **After:** AI for content, coaching, insights

5. Integration That Works

✗ **Before:** Broken Zoom portal, non-functional email ✓ **After:** Deep links, OAuth, calendar sync

Feature Comparison

Current App (45+ tabs)	Redesigned App (6 modules)
5 Training Systems	1 Learning Center
4 Resource Libraries	1 Content Vault
3 Achievement Systems	1 Recognition Feed
5 Team Views	1 Team Hub
2 Content Calendars	1 Unified Calendar
Multiple Analytics Tabs	1 Simple Dashboard
Broken Integrations	Working Deep Links
No AI Features	Comprehensive AI Suite

 Implementation Priority

Phase 1: Core Foundation (Weeks 1-2)

- Remove all broken features
- Implement basic CRM
- Create simple dashboard
- Set up authentication

Phase 2: AI Integration (Weeks 3-4)

- OpenAI content generation
- AI coaching chat
- Basic templates
- Content calendar

Phase 3: Team Features (Weeks 5-6)

- Invite system
- Manual tracking
- Basic challenges
- Resource sharing

Phase 4: Advanced Features (Weeks 7-8)

- Avatar videos
- Voice coaching

- Advanced analytics
 - Mobile optimization
-

Business Impact

Current App Results:

- User frustration: **High**
- Feature completion: **20%**
- Daily usage: **Low**
- Churn rate: **High**

Redesigned App Projections:

- User satisfaction: **High**
 - Feature completion: **100%**
 - Daily usage: **70%+**
 - Retention: **60%+ at 30 days**
-

The Bottom Line

User's Words: "We added way too much and lost focus on the main things people want."

Our Solution: Focus on 6 core modules that actually work, delivering real value through:

- Working features (not placeholders)
- AI that helps (not hype)
- Honest capabilities (not impossible promises)
- Simple navigation (not 45 tabs)
- Daily value (not one-time setup)

This redesign transforms the Prospect app from an overwhelming maze of broken features into a focused, powerful tool that network marketers will actually use every day.
